THE BEST PLANTS GROWN IN TEXAS

We have never had any ambition to be known as the largest plant growers in the world, but we do want to be known as the growers of the best plants grown in Texas. We believe that the ordinary little 6,000 to the crate commercial onion plants are too small for best results and we do not grow them.

We do no field packing of field run plants. Our onion plants are hauled from the fields in bulk to our packing sheds and put over grading tables. All small plants are discarded. The larger plants are hand selected and graded into uniform bunches for the different sizes we pack. Every bunch of onion plants contains 100 plants actual count. Our crates are larger than the standard crates and you will find our smallest size (6000 to crate) something entirely different from the ordinary little commercial 6000 size plants.

We stamp on each crate of plants we ship the actual number of plants in the crate. When you buy plants from us you get exactly what you pay for. Every year hundreds of truck loads of onion plants are hauled out of this county packed in onion crates, containing 60 bunches to crate, 50 plants to the bunch, a total of about 3000 plants. Many merchants buy these plants thinking they are getting crates of 6000 plants. We do not sell plants to trucks, to do so would be unfair to the merchant who handles our plants and receives his plants from us by express.

Ordinary onion plants are grown in seed beds, 20 to 30 pounds of seed to the acre and grown under irrigation. Dodges Famous Brand Onion Plants are grown in the open fields without irrigation, 6 pounds of seed to the acre. By this method of growing we produce stronger, sturdier, better rooted plants than can be grown by other methods of growing. A trial order of one crate of our Famous Brand Onion Plants will prove to you that there is quality in onion plants the same as in other merchandise. If you have a trade that appreciates quality, we have just what you want. More people every year are realizing that the little plants won't do. Hundreds of merchants all over the United States who sell our Famous Brand Plants, are building up a plant business that increases every year. We ask you for your plant business on the basis of quality and not on price. These extra quality plants cost more to grow, select and pack but are the cheapest plants on the market, value considered. They cost you a little more to buy, but will increase your plant business and make you more money and your customers will come back for them every year.

ALL prices quoted are net, no discounts, F.O.B. RAYMONDVILLE, TEXAS.

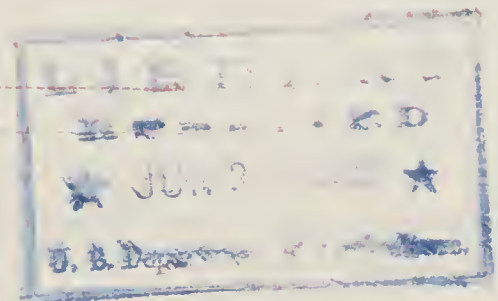

Prices quoted are for not less than crate lots of one variety. For mixed crates add 5c per thousand plants.

We especially recommend our larger plants to you, as they are stronger, sturdier plants from our earliest planted fields. They will make a mature crop earlier and stand more unfavorable weather. The 1000 and 1200 to crate onion plants are tied 20 to the bunch, other sizes 100 to the bunch; cabbage, tomato and other plants 50 to the bunch.

We can supply our Famous Brand Onion Plants in the following varieties: Crystal Wax Bermuda, Yellow Bermuda, Japanese or Ebenezer, Sweet Spanish Valencia Riverside Strain, Improved Denia and Giant Prizetaker.
